## ANC to provide new Orioles Park video screen **NEW!**

Posted Feb. 14, 2008 ([feedback](#)) ([submit story](#)) ([discuss](#))

The Maryland Stadium Authority selected ANC Sports Enterprises to renovate the existing light emitting diode (LED) signage and video screen system at Orioles Park at Camden Yards with Mitsubishi Electric's Diamond Vision technology for the 2008 Major League Baseball season.

Highlighted by a new 24-by-74-foot 20mm Quad Diamond Vision video screen, which will be positioned on top of the scoreboard, the new LED signage system will feature more than 5,000 square feet of animated signage.

ANC Sports is also replacing the existing main scoreboard with a 30-by-40 foot full color Diamond Vision matrix, while the right field outfield wall will come to life with a 14½-by-68 foot out-of-town scoreboard capable of displaying full motion video. The video display system renovation also includes over 200 feet of LED "ribbon" on both the upper and lower deck fascia.
